

About the Conference

The International Conference on Live Line Maintenance is a quadrennial conference that has been successfully held around Europe from 1992. The Conference provides a unique interdisciplinary forum for discussion about the live line maintenance and applications. Development, implementation, monitoring, applications, safety of employees, hazards, measuring techniques, standards and other related topics are within the scope of the conference.

ICOLIM 2025 will take place in Oslo, Norway, 2025 and is held in English.

Call for paper

Deadline for abstract: July 2024

Deadline for uploading paper: December 2024
